

## **Richa Bhardwaj**

### **Experienced Ruby on Rails Developer**

V-7, Parvana Vihar  
Sector-9, Rohini  
Delhi-85

Skype : richa1710

I started my journey in the software world with Ruby on Rails and fell in love with it. I develop web applications using Agile methodology with decent test coverage. I like solving problems, cooking and coding while humming to random tunes.

### **Projects taken as Contract Ruby on Rails Developer (December 2013- Till Date)**

- Sr. Ruby on Rails Developer at [Stella&Dot](#) using Ruby 2.1, Rails 4.1.0, Rspec, Backbone and Marionette
- Backend developer at [Scanbox](#)
- Backend developer at [Roadmojo](#)

### **Quovantis Technologies, India (January 2012 –December 2013)**

- Hired as a Software Developer to work on Ruby on Rails web applications
- Worked on building APIs for mobile applications in Rails
- Handled Server deployment and management for all Ruby on Rails applications on Linode, Amazon and Heroku with Apache, Nginx and Passenger
- Organized Ruby on Rails sessions to explain basic and advanced Rails features
- Got double promotion to work as a Tech Lead to handle a team of 4 engineers

### **Khojguru Pvt. Ltd., India (November 2011-January 2012)**

- Worked as a Ruby on Rails Developer to develop various features in Rails for multiple e-commerce and coupon based web applications

### **Vinayak Solutions Pvt. Ltd., India (July 2009-October 2011)**

- Worked on some great projects built in Ruby on Rails such as [Greylock Partners](#), [DealDey](#), [Pyromaniac](#) by following agile practices along with BDD using Cucumber, webrat, rspec
- Built applications from scratch through end and handled server management

### **InData Solutions, India (July 2008-June 2009)**

- RoR trainee to work on a project which was specially designed for autistic children to make the learning process easy for them

### **Education & Qualifications**

- B.Tech. Information Technology, Kurukshetra University (2005-2009)

### **Skills and Experience**

**Responsive Designs and Integration:** Photoshop, HTML5/CSS3, HAML, SASS, Javascript, jQuery, twitter-bootstrap, AngularJS, Ember, Backbone

**Language and Concepts** : Ruby 1.9.x and 2.0, Rails (2.x, 3.x, 4), AJAX, Mysql, SQLite, Postgresql, MongoDB

**Version Control System** : Git, Bitbucket, SVN

**Testing Frameworks** : rspec, cucumber, unit test

**Agile Tools** : PivotalTracker, Planning Poker estimation, Retrospective meetings, JIRA, Basecamp

**Third Party integration** : Facebook/Twitter API, Social Media integration, Payment gateway integration, Amazon AWS services, Mobile API development

**Deployment Tools** : Capistrano, Apache, Nginx, Heroku, Server Management

### **Projects**

- ✓ **Mytonomy** is an online video counseling platform to connect advice seekers and advice givers to deliver mentoring. Worked on Sprint planning, estimations, feature development, server management and email and skype communication with client
- ✓ **Cellrox** provides a multi-persona solution for smart mobile devices that enables two or more individual, completely independent personas to co-exist seamlessly on one device.
- ✓ **Greylock** is a U.S. based Venture Capital firm. Worked on feature development, sprint planning, HTML5/CSS3, server management
- ✓ **Dealdey** is a local deal site. Worked on pdf format coupon generation, SMS gateway integration and Google Maps integration

### **Technology Interests**

- ✓ Follow [Railscasts](#) and work on POC for new features
- ✓ Working on personal blog
- ✓ Member of Rails Heroes on HackHands to mentor the users with Rails specific problems
