10. 2019 - 05. 2020　　　　　　　　**Betting and Gambling**　　　　**Full Stack Developer**

- Project Name: Betting&Gambling
  This project is sports betting site which deals with sports matches all over the world. All matches and odds of them are received from oddsports.com. Football, baseball, basketball, American soccer, … and any other kinds of sports are performed.
  This site also has many games including Porker, Texas Holdem, Baduki(a kind of card games), Bitkong, Bustabit, power-ladder, power-ball, …
  This site can be divided into several sub-sites and also one main site which means that one company can have it's sub-companies in several areas of the world which administrate this site with different functions and UI.
  This site also has so many detailed functions of managing users, bettings and cash, UI.
  It is developed from the scratch with FeathersJS(NodeJS Framework) as backend and nuxt.js(Vuejs Framework) as frontend. As you can easily notice that these two frameworks are known as newest and good fast interactive frameworks.
  Admin page manages sports games. Sports games can be uploaded, added, updated, deleted and deferred and clients(betters) can bet on each sport game with cash or bitcoin. If each sport is finished, the betters can get prize money or lose his betting money.
  Everyone can easily find Bitkong game in bitkong.com and in this site there is completely same game as in bitkong.com. The steps are set with betting money and levels of this game set odd of each step. And there is a bonus on special days or conditions. There is also two playing modes – Demo Play, Real Play. As you can easily notice, in Demo Play mode betters do not use his cash or coupon.
- NodeJS, PHP, websockets, feathers.js, MongoDB, frontend Frameworks like vue.js, nuxtjs
